

## FUTURE SCHOLAR PRODUCT GUIDE

With a wide range of investment options, the Future Scholar 529 Plan allows you and your financial advisor to design a program to suit your education planning needs.

Operated by a well-known asset manager, the Future Scholar 529 Plan features:

- A comprehensive multi-manager investment lineup of actively managed funds as well as ETFs
- Age-based, target allocation and customized portfolio investment options
- Unique gifting and estate planning benefits provided by Section 529 of the IRC, including rollover to Roth IRA provisions

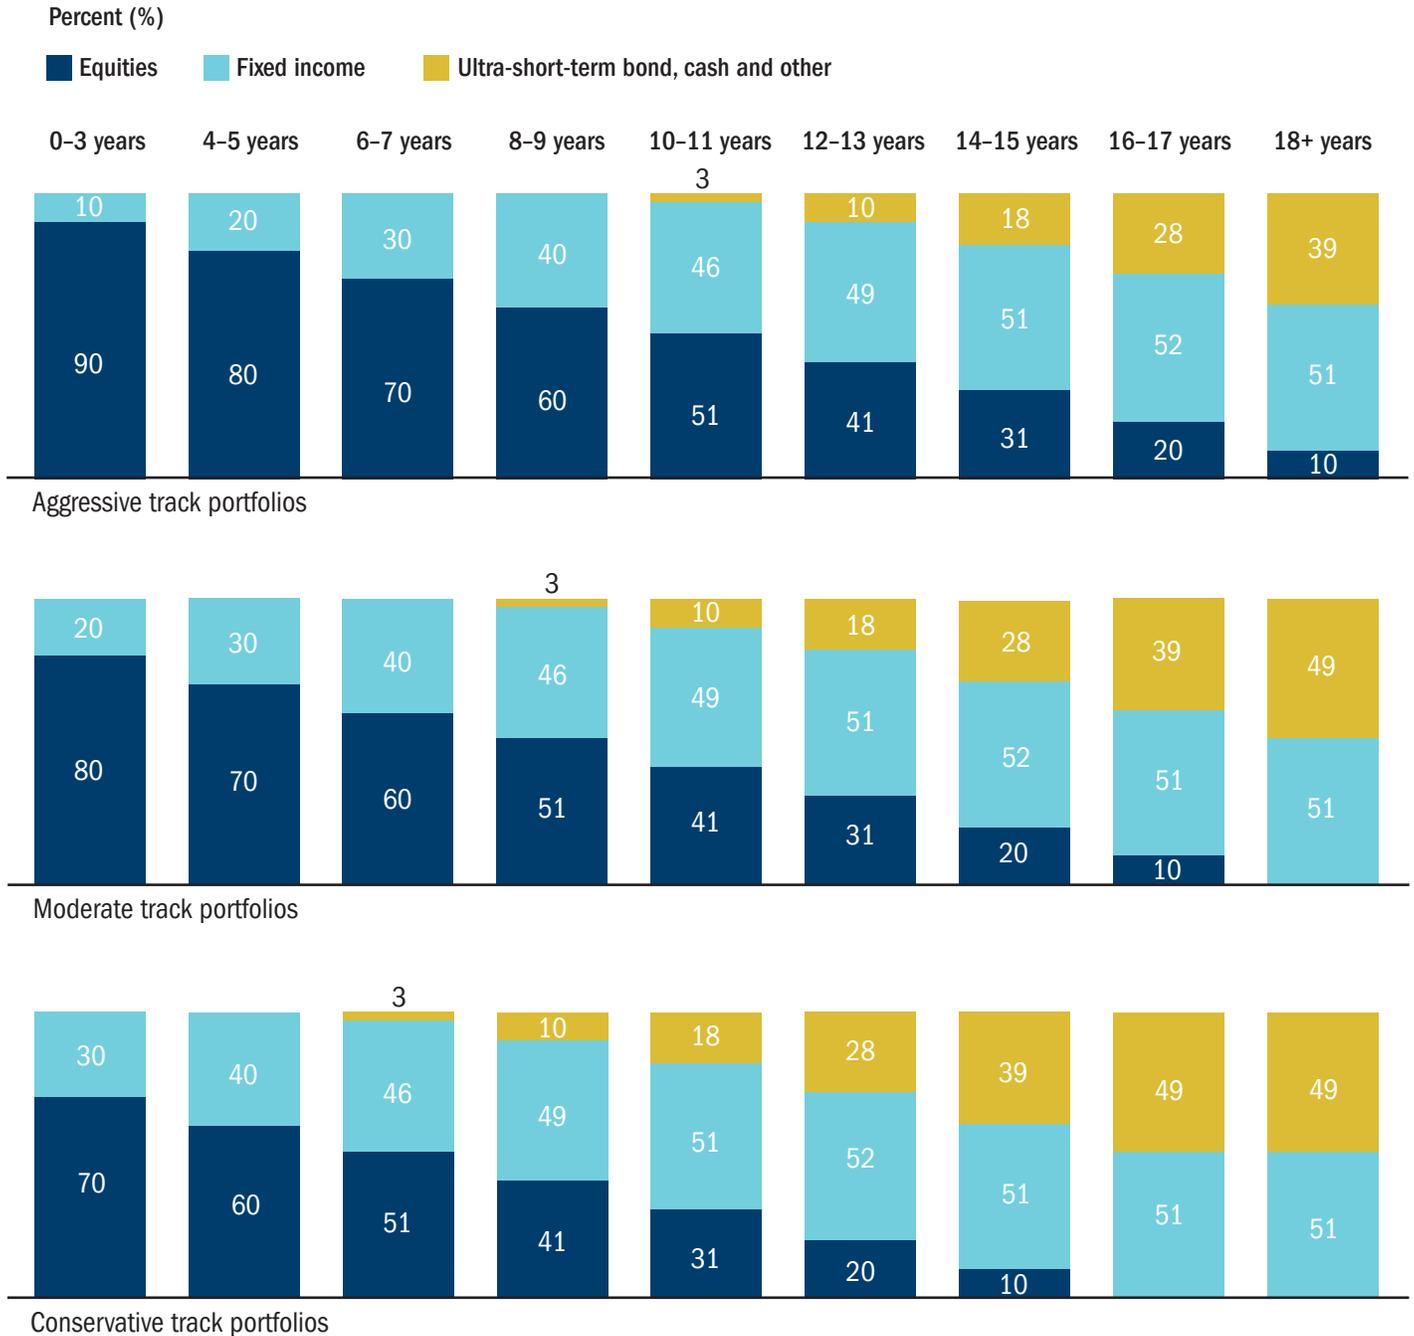

WE OFFER A DIVERSE LINEUP OF FUNDS FROM SOME OF THE INDUSTRY'S LEADING MONEY MANAGERS.

## AGE-BASED OPTIONS

Select an age-based track — Conservative, Moderate or Aggressive — that fits your college-planning needs. Your investments will be placed in a portfolio based on your beneficiary’s age and your personal risk tolerance.

As the beneficiary gets closer to college age, the portfolio will shift to a more conservative allocation. This means that when it’s time for college, a large proportion of your funds will be in more conservative, lower risk investments.

The percentage allocations for age-based and target-allocation portfolios shown are target allocations as of December 31, 2023. These target allocations and the actual percentage allocations to each underlying fund and asset class are subject to change at any time and based on the discretion of the Global Asset Allocation Team at Columbia Threadneedle. In addition, the underlying funds included in the asset allocation portfolios may change. Please see the Program Description for individual asset class target-allocation ranges.

## TARGET-ALLOCATION PORTFOLIOS

Seven target-allocation portfolios allow your clients to choose the pre-built portfolio that most closely corresponds with their individual investment strategy and risk tolerance.

<sup>1</sup> Although the issuer seeks to preserve the value of the investment at a fixed share price, it is possible to lose money by investing in this portfolio. The Account Owner may elect to invest in the Columbia Legacy Capital Preservation 529 Portfolio and dollar cost average from such option to any other investment portfolio.

<sup>2</sup> This portfolio invests in a separately managed account that invests primarily in book value investment contracts backed by one or more portfolios of short- and intermediate-term investment-grade bonds, Class I shares of Columbia Government Money Market Fund and, with respect to contributions made prior to October 1, 2010, a funding agreement.

The ETF shares used by the plan are listed for trading on an exchange and can be bought and sold on the secondary market at market prices. Although it is expected that the market price of an ETF share typically will approximate its net asset value (NAV), there may be times when the market price and the NAV vary significantly. Thus, the plan may pay more or less than NAV when it buys ETF shares on the secondary market and may receive more or less than NAV when it sells those shares.

**You should consider the investment objectives, risks, charges and expenses associated with any Columbia fund or 529 plan investment before investing. Visit [www.columbiathreadneedle.com](http://www.columbiathreadneedle.com) for a mutual fund prospectus or 529 plan's program brochure, which provides this and other important information. The prospectus or program brochure should be read carefully before investing. You should also consider, before investing, whether the investor's or designated beneficiary's home state offers any state tax or other state benefits such as financial aid, scholarship funds, and protection from creditors that are only available for investments in such state's qualified tuition program.**

**Although money contributed to the accounts will be invested in portfolios that hold mutual funds (among other types of investments), none of the Trust, the Plan or any of the Plan's investment portfolios is a mutual fund, and an investment in the Program is not an investment in shares of any mutual fund. See the Program Description for more information about the securities issued through the Program.**

**Investment risks** The section below summarizes some of the risks involved with investing in the Program portfolios and is not intended to be a complete list of the investment risks. For a complete list of investment risks, please see the Program Description. An investment in these portfolios may offer the potential for long-term growth but also involves certain risks.

**Equity securities are subject to stock market fluctuations that occur in response to economic and business developments.**

**Stocks of small- and mid-cap companies pose special risks, including possible illiquidity and greater price volatility than stocks of larger, more established companies.**

**International investing involves special risks, including foreign taxation, currency risks, risks associated with possible differences in financial standards and other risks associated with future political and economic developments.**

**Investing in fixed-income securities may involve certain risks, including the credit quality of individual issuers, possible prepayments, market or economic developments and yields and share price fluctuations due to changes in interest rates.**

**There are special risks associated with an investment in real estate, including credit risk, interest rate fluctuations and the impact of varied economic conditions.**
